VOLUME IX.

SUBJECT INDEX.

Address.
Annual — by the President, Charles B. Dudley, 19.
American Society for Testing Materials.
Annual Report of the Executive Committee of the —, 670.
List of Standard Specifications of the —, 681.
Officers, Members of the Executive Committee, and Standing Committees of the —, 667.
Past Officers of the —, 668.
Standing Advisory Committees of the —, 669.
Annealing.
Notes on the — of Medium-Carbon Steel. William Campbell, 370.
Apparatus.
A New Method and — for the Determination of the Specific Gravity of Semi-Solid Substances. Albert Sommer, 602.
Bars.
Some Tests of Bond of Steel — Embedded in Concrete by Three Methods. H. C. Berry, 495.
Beams.
Further Tests of Reinforced Concrete — under Oft-Repeated Loading. H. C. Berry, 493.
Tests of Standard I — and Bethlehem Special I — and Girder —. Edgar Marburg, 378. Discussion, 408.
Bearing.
Notes on the — Value of Rods Embedded in Concrete. Robert A. Cummings, 502.
The Compressive Strength of Concrete Piers as Affected by Varying — Areas. Edgar Marburg, 509.
Bending Tests.
See **Tests.**
Bethlehem Beams.
See **Beams.**
Bitumens (see also **Bituminous Materials**).
A Further Development of the Penetrometer as Used in the Determination of the Consistency of Semi-Solid —. C. N. Forrest, 600.
Bituminous Materials (see also **Bitumens**).
A Machine for Testing the Ductility of Bituminous Paving Cements. Francis P. Smith, 594.
— for Use in and on Road Surfaces, and Means of Determining Their Character. Clifford Richardson, 580.
General Discussion on —, 605.

Bituminous Materials (Continued).
Improved Instruments for the Physical Testing of —. Herbert Abraham, 568.
Methods for the Examination of — for Road Construction. Clifford Richardson and C. N. Forrest, 588.
Blowholes.
The Closing of — in Steel Ingots. Henry M. Howe, 327. Discussion, 345.
Boiler Furnaces.
Influence of the Various Constituents of Coal on the Efficiency and Capacity of —. D. T. Randall and Perry Barker, 626. Discussion, 634.
Boiler Plate.
Standard Specifications for Open-Hearth — and Rivet Steel, 51.
Bond.
Some Tests of — of Steel Bars Embedded in Concrete by Three Methods. H. C. Berry, 495.
Brick.
Standard Specifications for Paving and Building —. Report of Committee D, 131. Discussion, 135.
Bridges.
Standard Specifications for Structural Steel for —, 37.
Buildings.
Standard Specifications for Structural Steel for —, 47.
Carbon.
The Effect of Free — in Tars from the Standpoint of Road Treatment. Prévost Hubbard, 549. Discussion, 565.
Carbon Streaks.
Dark — in Segregated Metal in "Split Heads" of Rails. P. H. Dudley, 98.
Castings.
Standard Specifications for Cast Iron and Finished —. Report of Committee B, 110.
Cast Iron.
Standard Specifications for — and Finished Castings. Report of Committee B, 110.
The Permanent Mold and Its Effect on —. E. A. Custer, 442. Discussion, 453.
Cement (see also **Concrete**).
A Suggestion as to a Commercial Use to be made of — Testing. Richard K. Meade, 464. Discussion, 467.
Disintegration of Fresh — Floor Surfaces by the Action of Smoke Gases at Low Temperatures. Alfred H. White, 530.
Standard Specifications for —, 116.
Standard Specifications for —. Report of Committee C, 114.
Standard Specifications for Clay and — Sewer Pipes. Report of Committee L, 273.

Clay.
Standard Specifications for — and Cement Sewer Pipes. Report of Committee L, 273.
Coal (see also **Fuel**).
Influence of the Various Constituents of — on the Efficiency and Capacity of Boiler Furnaces. D. T. Randall and Perry Barker, 626. Discussion, 634.
Standard Specifications for —. Preliminary Report of Committee O, 277.
Columns.
Notes on Tests of Steel — in Progress at Watertown Arsenal. James E. Howard, 413. Discussion, 418.
Tests of Plain and Reinforced Concrete —. M. O. Withey, 469. Discussion, 490.
Committee Reports.
Committee A on Standard Specifications for Steel, 35. Discussion, 70.
Committee B on Standard Specifications for Cast Iron and Finished Castings, 110.
Committee C on Standard Specifications for Cement, 114.
Committee D on Standard Specifications for Paving and Building Brick, 131. Discussion, 135.
Committee E on Preservative Coatings for Structural Materials, 139. Discussion, 205.
Committee F on Heat Treatment of Iron and Steel, 214. Discussion, 217.
Committee H on Standard Tests for Road Materials, 219.
Committee I on Reinforced Concrete, 225.
Committee K on Standard Methods of Testing, 263.
Committee L on Standard Specifications and Tests for Clay and Cement Sewer Pipes, 273.
Committee O on Standard Specifications for Coal, 277.
Committee P on Fireproofing Materials, 280.
Committee Q on Standard Specifications for the Grading of Structural Timber, 283.
Committee S on Waterproofing Materials, 292.
Committee U on the Corrosion of Iron and Steel, 295. Discussion, 301.
Committee V on Standard Specifications for Cold-Drawn Steel, 308.
Committee W on Standard Specifications for Hard-Drawn Copper Wire, 309.
Compression during Solidification.
The Physical Quality of Steel which has been Subjected to —. Bradley Stoughton, 348. Discussion, 364.
Compressive Strength.
The — of Concrete Piers as Affected by Varying Bearing Areas. Edgar Marburg, 509.

Concrete (see also **Cement**).
— Reinforced by Nails. Leon S. Moisseiff, 514. Discussion, 519.
Further Tests of Reinforced — Beams under Oft-Repeated Loading. H. C. Berry, 493.
Notes on the Bearing Value of Rods Embedded in —. Robert A. Cummings, 502.
Paints for —: Their Need and Requirements. G. D. White, 520. Discussion, 526.
Reinforced —. Report of Committee I, 225.
Some Tests of Bond of Steel Bars Embedded in — by Three Methods. H. C. Berry, 495.
Tests of Plain and Reinforced — Columns. M. O. Withey, 469. Discussion, 490.
The Compressive Strength of — Piers as Affected by Varying Bearing Areas. Edgar Marburg, 509.

Consistency.
A Further Development of the Penetrometer as Used in the Determination of the — of Semi-Solid Bitumens. C. N. Forrest, 600.

Copper Wire.
Standard Specifications for Hard-Drawn —, 311.
Standard Specifications for Hard-Drawn —. Report of Committee W, 309.

Corrosion.
The — of Iron and Steel. Report of Committee U, 295. Discussion, 301.

Dead Load.
Some Results of — Bending Tests of Timber by means of a Recording Deflectometer. Harry D. Tiemann, 534.

Driving Axle.
An Interesting — Failure. M. H. Wickhorst, 422. Discussion, 425.

Ductility.
A Machine for Testing the — of Bituminous Paving Cements. Francis P. Smith, 594.

Engineering.
— Responsibility. Annual Address by the President, Charles B. Dudley, 19.

Explosives.
The Standardization of —. Charles E. Munroe, 638. Discussion, 642.

Fireproofing.
— Materials. Report of Committee P, 280.
Standard Test for Fireproof Partition Construction, 281.

Floor Surfaces.
Disintegration of Fresh Cement — by the Action of Smoke Gases at Low Temperatures. Alfred H. White, 530.

Free Carbon.
See **Carbon.**
Fuel (see also **Coal**).
— Investigations, Geological Survey: Progress during the Year Ending June 30, 1909. J. A. Holmes, 619. Discussion, 623.
Galvanizing.
The Testing of Galvanized and Other Zinc-Coated Iron. W. H. Walker, 431. Discussion, 440.
Geological Survey, U. S.
Fuel Investigations, —: Progress during the Year Ending June 30, 1909. J. A. Holmes, 619. Discussion, 623.
The Structural Materials Testing Laboratories, —: Progress during the Year Ending June 30, 1909. Richard L. Humphrey, 456.
Girder Beams.
See **Beams.**
Hardness.
A Machine of New Design for — Tests. Thorsten Y. Olsen, 664.
Heat Treatment.
— of Iron and Steel. Report of Committee F, 214. Discussion, 217.
Impact.
Measurement of — Stresses. B. W. Dunn, 644.
Ingots.
Notes on Tests of — and Derivative Shapes in Progress at Watertown Arsenal. James E. Howard, 319.
The Closing of Blowholes in Steel —. Henry M. Howe, 327. Discussion, 345.
Inhibitive Power.
Investigation of the — of Certain Pigments on the Corrosion of Iron and Steel. Report of Joint Sub-Committee from Committees E and U, 203.
Instruments.
Improved — for the Physical Testing of Bituminous Materials. Herbert Abraham, 568.
Insulating Materials.
The Desirability of Standardizing the Testing of Insulating and Other Materials, 652.
Iron.
Heat Treatment of — and Steel. Report of Committee F, 214. Discussion, 217.
Standard Specifications for Cast — and Finished Castings. Report of Committee B, 110.
Standard Specifications for Foundry Pig —, 111.
The Corrosion of — and Steel. Report of Committee U, 295. Discussion, 301.
The Permanent Mold and Its Effect on Cast —. E. A. Custer, 442. Discussion, 453.

Iron (Continued).
The Testing of Galvanized and Other Zinc-Coated —. W. H. Walker, 431. Discussion, 440.
Linseed Oil.
—. Report of Sub-Committee of Committee E, 141.
Machine (see also **Apparatus, Instruments, Testing Machine**).
A — for Testing the Ductility of Bituminous Paving Cements. Francis P. Smith, 594.
A — of New Design for Hardness Tests. Thorsten Y. Olsen, 664.
Methods of Testing.
Standard —. Report of Committee K, 263.
Mold.
The Permanent — and Its Effect on Cast Iron. E. A. Custer, 442. Discussion, 453.
Nails.
Concrete Reinforced by —. Leon S. Moisseiff, 514. Discussion, 519.
Paints (see also **Preservative Coatings**).
— for Concrete: Their Need and Requirements. G. D. White, 520. Discussion, 526.
Partition Construction.
Standard Test for Fireproof —, 281.
Penetrometer.
A Further Development of the — as Used in the Determination of the Consistency of Semi-Solid Bitumens. C. N. Forrest, 600.
Permanent Mold.
See **Mold.**
Piers.
The Compressive Strength of Concrete — as Affected by Varying Bearing Areas. Edgar Marburg, 509.
Pig Iron.
Standard Specifications for Foundry —, 111.
Pigments.
Investigation of the Inhibitive Power of Certain — on the Corrosion of Iron and Steel. Report of Joint Sub-Committee from Committees E and U, 203.
Preservative Coatings (see also **Paints**).
— for Structural Materials. Report of Committee E, 139. Discussion, 205.
President's Address.
See **Address.**
Proceedings.
Summary of — of the Twelfth Annual Meeting, 7.
Rails.
Dark Carbon Streaks in Segregated Metal in "Split Heads" of —. P. H. Dudley, 98.

Rails (Continued).
Further Investigations of Broken Steel —. Henry Fay and R. W. G. Wint, 77. Discussion, 106.
General Discussion on Steel —, 106.
Investigation of Defective Open-Hearth Steel —. Robert Job, 90. Discussion, 106.
Standard Specifications for Bessemer Steel —, 62.
Standard Specifications for Open-Hearth Steel —, 66.
Reinforced Concrete.
See **Concrete.**
Repeated Loading.
Further Tests of Reinforced Concrete Beams under Oft- —. H. C. Berry, 493.
Rivet Steel.
Standard Specifications for Open-Hearth Boiler Plate and —, 51.
The Effect of Tension on the Shearing Strength of —. E. L. Hancock, 427.
Roads.
Bituminous Materials for Use in and on Road Surfaces, and Means of Determining Their Character. Clifford Richardson, 580.
Methods for the Examination of Bituminous Materials for Road Construction. Clifford Richardson and C. N. Forrest, 588.
Standard Tests for Road Materials. Report of Committee H, 219.
The Effect of Free Carbon in Tars from the Standpoint of Road Treatment. Prévost Hubbard, 549. Discussion, 565.
Rods.
Notes on the Bearing Value of — Embedded in Concrete. Robert A. Cummings, 502.
Semi-Solid Substances.
A New Method and Apparatus for the Determination of the Specific Gravity of — . Albert Sommer, 602.
Sewer Pipes.
Standard Specifications and Tests for Clay and Cement —. Report of Committee L, 273.
Shearing.
The Effect of Tension on the — Strength of Rivet Steel. E. L. Hancock, 427.
Ships.
Standard Specifications for Structural Steel for —, 42.
Smoke Gases.
Disintegration of Fresh Cement Floor Surfaces by the Action of — at Low Temperatures. Alfred H. White, 530.
Specifications.
Standard — for Bessemer Steel Rails, 62.
Standard — for Cement, 116.
Standard — for Foundry Pig Iron, 111.
Standard — for Hard-Drawn Copper Wire, 311.

Specifications (Continued).
Standard — for Open-Hearth Boiler Plate and Rivet Steel, 51.
Standard — for Open-Hearth Steel Rails, 66.
Standard — for Steel Splice Bars, 56.
Standard — for Steel Tires, 58.
Standard — for Structural Steel for Bridges, 37.
Standard — for Structural Steel for Buildings, 47.
Standard — for Structural Steel for Ships, 42.
Standard Test for Fireproof Partition Construction, 281.
Specific Gravity.
A New Method and Apparatus for the Determination of the — of Semi-Solid Substances. Albert Sommer, 602.
Splice Bars.
Standard Specifications for Steel —, 56.
Standardization.
The Desirability of Standardizing the Testing of Insulating and Other Materials. C. E. Skinner, 652.
The — of Explosives. Charles E. Munroe, 638. Discussion, 642.
Standard Specifications.
See **Specifications.**
Standard Tests.
See **Tests.**
Steel.
Further Investigations of Broken — Rails. Henry Fay and R. W. G. Wint, 77. Discussion, 106.
General Discussion on — Rails, 106.
Heat Treatment of Iron and —. Report of Committee F, 214. Discussion, 217.
Investigation of Defective Open-Hearth — Rails. Robert Job, 90. Discussion, 106.
Notes on Tests of — Columns in Progress at Watertown Arsenal. James E. Howard, 413. Discussion, 418.
Notes on the Annealing of Medium-Carbon —. William Campbell, 370.
Some Tests of Bond of — Bars Embedded in Concrete by Three Methods. H. C. Berry, 495.
Standard Specifications for Bessemer — Rails, 62.
Standard Specifications for Cold-Drawn —. Report of Committee V, 308.
Standard Specifications for Open-Hearth Boiler Plate and Rivet —. 51.
Standard Specifications for Open-Hearth — Rails, 66.
Standard Specifications for —. Report of Committee A, 35. Discussion, 70.
Standard Specifications for — Splice Bars, 56.
Standard Specifications for — Tires, 58.
Standard Specifications for Structural — for Bridges, 37.

Steel (Continued).
Standard Specifications for Structural — for Buildings, 47.
Standard Specifications for Structural — for Ships, 42.
The Closing of Blowholes in — Ingots. Henry M. Howe, 327. Discussion, 345.
The Corrosion of Iron and —. Report of Committee U, 295. Discussion, 301.
The Effect of Tension on the Shearing Strength of Rivet —. E. L. Hancock, 427.
The Physical Quality of — which has been Subjected to Compression during Solidification. Bradley Stoughton, 348. Discussion, 364.
Structural Materials.
Preservative Coatings for —. Report of Committee E, 139. Discussion, 205.
The — Testing Laboratories, U. S. Geological Survey: Progress during the Year Ending June 30, 1909. Richard L. Humphrey, 456.
Tars.
The Effect of Free Carbon in — from the Standpoint of Road Treatment. Prévost Hubbard, 549. Discussion, 565.
Tension.
The Effect of — on the Shearing Strength of Rivet Steel. E. L. Hancock, 427.
Testing (see also **Tests**).
A Machine for — the Ductility of Bituminous Paving Cements. Francis P. Smith, 594.
A Suggestion as to a Commercial Use to be made of Cement —. Richard K. Meade, 464. Discussion, 467.
Improved Instruments for the Physical — of Bituminous Materials. Herbert Abraham, 568.
Notes on — Turbine Oil. Robert Job, 614. Discussion, 616.
Standard Methods of —. Report of Committee K, 263.
The Desirability of Standardizing the — of Insulating and Other Materials. C. E. Skinner, 652.
The Structural Materials — Laboratories, U. S. Geological Survey: Progress during the Year Ending June 30, 1909. Richard L. Humphrey, 456.
The — of Galvanized and Other Zinc-Coated Iron. W. H. Walker, 431. Discussion, 440.
Testing Machine (see also **Apparatus, Instruments, Machine**).
Principal Features of a 1,200,000-lb. —, with Special Reference to a New System of Transmitting the Pressure Developed in the Hydraulic Cylinder to the Scale Beam. Thorsten Y. Olsen, 659.
Tests (see also **Testing**).
Further — of Reinforced Concrete Beams under Oft-Repeated Loading. H. C. Berry, 493.
Notes on — of Ingots and Derivative Shapes in Progress at Watertown Arsenal. James E. Howard, 319.

Tests (Continued).
Notes on — of Steel Columns in Progress at Watertown Arsenal. James E. Howard, 413. Discussion, 418.
Some Results of Dead Load Bending — of Timber by means of a Recording Deflectometer. Harry D. Tiemann, 534.
Some — of Bond of Steel Bars Embedded in Concrete by Three Methods. H. C. Berry, 495.
Standard Test for Fireproof Partition Construction, 281.
— of Plain and Reinforced Concrete Columns. M. O. Withey, 469. Discussion, 490.
— of Standard I Beams and Bethlehem Special I Beams and Girder Beams. Edgar Marburg, 378. Discussion, 408.
Timber.
Some Results of Dead Load Bending Tests of — by means of a Recording Deflectometer. Harry D. Tiemann, 534.
Standard Specifications for the Grading of Structural —. Report of Committee Q, 283.
Tires.
Standard Specifications for Steel —, 58.
Turbine Oil.
Notes on Testing —. Robert Job, 614. Discussion, 616.
Waterproofing.
— Materials. Report of Committee S, 292.
Watertown Arsenal.
Notes on Tests of Ingots and Derivative Shapes in Progress at —. James E. Howard, 319.
Notes on Tests of Steel Columns in Progress at —. James E. Howard, 413. Discussion, 418.
Wire.
See **Copper Wire.**

AUTHOR INDEX.

Abraham, Herbert.
Improved Instruments for the Physical Testing of Bituminous Materials, 568.
Discussion, 612, 613.
Aiken, W. A.
Report of Committee S on Waterproofing Materials, 292.
Barker, Perry.
Influence of the Various Constituents of Coal on the Efficiency and Capacity of Boiler Furnaces, 626.
Berry, H. C.
Further Tests of Reinforced Concrete Beams under Oft-Repeated Loading, 493.
Some Tests of Bond of Steel Bars Embedded in Concrete by Three Methods, 495.
Blanchard, A. H.
Discussion, 566.
Boorman, T. Hugh.
Discussion, 610.
Bostwick, W. A.
Discussion, 347.
Bush, B. F.
Preliminary Report of Committee O on Standard Specifications for Coal, 277.
Campbell, William.
Notes on the Annealing of Medium-Carbon Steel, 370.
Capp, J. A.
Report of Committee W on Standard Specifications for Hard-Drawn Copper Wire, 309.
Christie, James.
Discussion, 408, 636.
Church, S. R.
Discussion, 565, 567.
Colby, Albert Ladd.
Discussion, 75, 412.
Conradson, P. H.
Discussion, 617.
Cummings, Robert A.
Notes on the Bearing Value of Rods Embedded in Concrete, 502.
Cushman, Allerton S.
Report of Committee U on the Corrosion of Iron and Steel, 295.
Discussion, 306.

Custer, E. A.
The Permanent Mold and Its Effect on Cast Iron, 442.
Discussion, 454, 455, 634.

Darke, J. M.
Discussion, 217.

Dewar, John.
Discussion, 526, 527, 529.

Dow, A. W.
Report of Committee S on Waterproofing Materials, 292.

Dudley, Charles B.
Annual Address by the President:—Engineering Responsibility, 19.
Annual Report of the Executive Committee, 670.
Discussion, 108, 210, 345, 441, 455, 527, 616, 634, 635, 636.

Dudley, P. H.
Dark Carbon Streaks in Segregated Metal in "Split Heads" of Rails, 98.

Dunn, B. W.
Measurement of Impact Stresses, 644.
Discussion, 642.

Evans, S. M.
Discussion, 208, 209.

Fay, Henry.
Further Investigations of Broken Steel Rails, 77.
Discussion, 107, 108.

Fernald, R. H.
Discussion, 623.

Fireman, P.
Discussion, 209.

Forrest, C. N.
A Further Development of the Penetrometer as Used in the Determination of the Consistency of Semi-Solid Bitumens, 600.
Methods for the Examination of Bituminous Materials for Road Construction, 588.

Gardner, H. A.
Discussion, 208, 209, 211, 213.

Hancock, E. L.
The Effect of Tension on the Shearing Strength of Rivet Steel, 427.

Handy, J. O.
Discussion, 305.

Hatt, W. K.
Report of Committee Q on Standard Specifications for the Grading of Structural Timber, 283.
